

Dear colleague:

INTERACT Point Tool Box is organising a specific **task-force meeting** to take place in **Valencia** the next **2-3 October**, with the attendance of managers of up to 14 INTERACT IIIB – IIIC programmes, in view to offering a forum for the exchange of experiences and gathering common conclusions on the implementation of INTERREG **programme management** during the current period 2000-2006.

Bearing in mind the ongoing preparation phase of the new INTERREG programmes **2007-2013**, INTERACT Programme is elaborating a document –the “*Analysis of tools and methods identified in the management of the INTERREG IIIB - IIIC programmes 2000-2006*”- which gathers main practices identified as **specific** and **only featured** by a number of INTERREG programmes whose implementation could be of interest to others. The different tools and methods are grouped according to their contribution to the achievement of different **programme targets**.

For this purpose, it is our pleasure to **invite you to participate in this task-force meeting** where two representatives per programme will discuss the advantages and disadvantages observed in the implementation of each tool and method identified. Conclusions raised will be included in the final version of the document.

We would be pleased if you could confirm the persons in your programme who will attend the meeting, by filling in the attached **registration form** and sending it to the following address: ip.tb@interact-eu.net

You will also find a **draft agenda** attached to this invitation. The final agenda, together with detailed information concerning **logistics**, will be forwarded to you following your registration.

We look forward to meeting you in Valencia, and we thank you in advance for your kind collaboration and interest.
