

Let's brainstorm!

Working tables – Gaps and programmes' needs

Four topics

1. How to ensure the recognition/interest of capitalisation as a necessary management practice?
2. Definition and planning (use) of capitalisation tools and services provided by Interact
3. Fostering the use of capitalisation as a consolidated management practice
4. How could capitalisation serve the preparation and definition of Interreg programmes post 2020? How could it be used as a tool (also linked with evaluation)?

For each topic, reflect on...

How can we advance with this issue?

What is the biggest challenge at the moment?

What do you think would be the best outcome?

What would help you to advance in this topic?

What advice would you have?

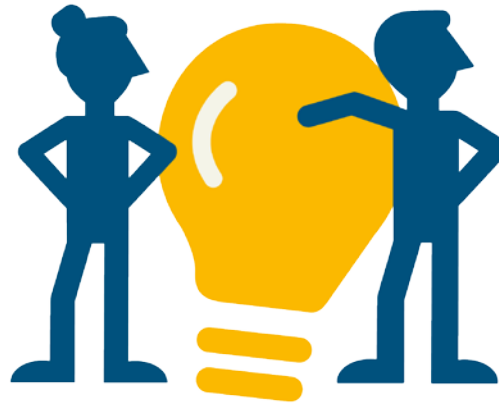

What kind of support would you need?

Let's start!

1) How to ensure the recognition/interest of capitalisation as a necessary management practice?

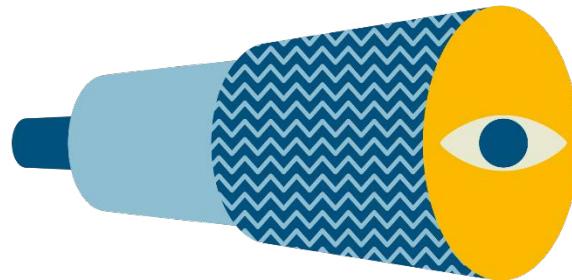

- 20' to discuss on the questions (find your sheet of paper)
- 3 groups
- One Interact person per group
- Appoint a reporter!

2) Definition and planning (use) of capitalisation tools and services provided by Interact

COFFEE BREAK

3) Fostering the use of capitalisation as a consolidated management practice

4) How could capitalisation serve the preparation and definition of Interreg programmes post 2020? How could it be used as a tool (also linked with evaluation)?
