Hospital de la Cerdanya / Hôpital de Cerdagne

HOSPITAL TRANSFRONTERER DE LA CERDANYA I EL CAPCIR
HÔPITAL TRANSFRONTALIER DE CERDAGNE ET CAPCIR

BASIC POINTS

Territory with common history and culture (Language)

30.000 inhabitants. Touristic peaks of 150.000

2 EU members

2 Health Administrations, with different health Systems and health care organizations.

Asymmetric competences (Central Government – Regional Government)

Asymmetric health care offer:

- South: Local Hospital of Puigcerdà:
 - North: Long care, rehabilitation
 - Different PHC approach
-

Same health needs for population:

- Improve access to health care
- Assure permanent and continuous care
- Quality and security assurance.

PROJECT GOALS

1. To create a common hospital which should be the main axis of a network of cross border health services regarding the rights and duties of the citizens in the two states
2. To create a cross border organization for the construction and management of a hospital for acute patients which should attend to the needs/services of all the population in Cerdanya and Capcir.
3. To set up an organization based on a sole culture which should integrate the advantages of the two health systems.
4. To guarantee a single and participative Governance. A single management approach to and a single health service's provision model.
5. A hospital established in a single territory where both health planning systems have been taken into account.
6. Project in the context of the Euroregion

MAIN PROBLEMS

- A. Differences regarding tools, rhythms and different administrations policies (local, regional, national, European). Various administrations different degrees of political decentralization.
- B. Difficulties to identify the corresponding counterparts. Communication problems between administrations. Coordination difficulties.
- C. Project with a strong ideological component (European construction) tied to political events. (local, regional, national and European constitutional elections)
- D. Difficulties in recruiting professionals and in addressing general public directly. Difficulties in responding to expectancy in real time.
- E. Difficulties in achieving that the actors crossborder topics and projects be considered as a priority by the administration (local, regional, national)
- F. Difficulties in solving certain issues that are already known and debated but not treated: free movement for patients, expenditure reimbursement, quality guarantee, workers professional certification

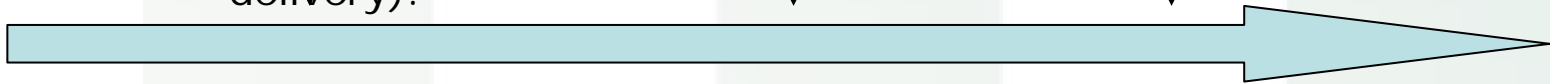

1997. Professional Cooperation.

2002. Services of the Puigcerdà hospital for the Cerdanya (Emergencies and delivery).

2003. Feasibility of Crossborder Common Hospital Cerdanya

2006. Hospital in both health network

INSTITUTIONAL CONCEPTION

~~Consortium Bayonne treaty ?~~

2006. Private Foundation Catalan law

2008 EGCT Works Bid

Legal steps

- Transitory Foundation . Governance decisions
 - 60% Catalunya
 - 40% France
 - Participation of local governments
 - Decision process
- Legal adaptation Spain (02/08) France (04/08)
- France – Spain Health Agreement (09/08)
- EGTC Legal set up (from now)
- Bid Announcement (09/08)

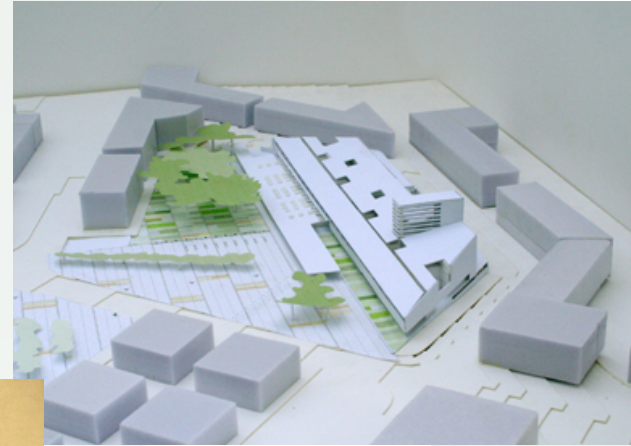

Actions

- Functional Plan
- Architect selection
- Executive Construction project
- Construction bid (Announcement September 1st of 2008)
- Works (beginning 2009)
- Construction works (24 months)

FRANCE-SPAIN-ANDORRA TERRITORIAL COOPERATION PROGRAMME 2007-2013

COMMON SECURITY MANAGEMENT OF THE BIELSA-ARAGNOUET CROSS BORDER TUNNEL

Duration:

Start: January 2009

End: December 2012

Project manager: *Consortio for the management, conservation of the Bielsa-Aragnouet Tunnel and its access*

Members of the Consorcio:

Aragon Government (Spain)

General Council of Hautes-Pyrénées (France)

TOTAL COST: 16.535.242,00€

ERDF: 65% of total cost :10.747.732€

General Objective: to ensure permanent functioning and viability of the tunnel in appropriate conditions of security

Strategic objectives:

- To improve the security of the cross border tunnel for users by investing in a new infrastructure in this field.

- to contribute to the territorial sustainable development by reducing isolation which is entailed by the Pyrenees, more particularly as regards transport.
- to develop economic and touristic potential in the area and boost territorial development.
- to encourage stable cooperation between both sides of the cross border area.

Main actions:

Common management of the cross border tunnel:

-Implementation of a security plan in case of emergency

-Improvement of the security by new infrastructures: ventilation, lighting, systems against fire, electrical power, road signs, communication system, centralized technical management system.
