

# IT Tools and Monitoring Systems Network

**17 February 2022 (9.30 - 15.30 CET)**  
Online meeting  
DRAFT Agenda

## IT Tools and Monitoring Systems Network 17 February 2022

### Outline

The monitoring systems and IT tools network aims at Europe-wide learning and exchange of experience and information among experts in Interreg monitoring systems and related IT Tools. Monitoring systems play a key role in programme management and also represent the programme to the outside world. There are many topics of joint strategic and practical interest to Interreg monitoring systems experts. Therefore, this network ultimately aims to exchange and provide attractive and straightforward solutions to programme stakeholders, including project applicants.

### Objectives

For the 2021-2027 period, programmes have started building new or adapting their monitoring systems to the new regulations. Furthermore, programmes are looking into further simplification or improvements of the processes in monitoring systems.

The objective of this meeting is to focus on useful IT features or simplifications related to:

- **the development of the first steps of the project lifecycle**, particularly; call management, project application, project selection, assessment and decision making
- **the reporting process**; focus on features related to one of the reporting steps (partner reporting, project reporting, management verifications, etc) or on tools that are useful for the process for either traditional-, disentangled- or continuous reporting.

Following a flexible and participants-driven approach, the detailed content of this meeting is established based on a survey during registration and programmes proposed presentations of the features. There will be time reserved for more open discussions on monitoring systems.

## IT Tools and Monitoring Systems Network 17 February 2022

Thursday

17 February 2022

9.30 – 9.45

**Welcome and Introduction**

Interact

9:45 – 10.15

**State of play**

A short update on the state of play of different programmes monitoring systems. *Where are you at with the new system development? What about IT system procurement?*

10.15 – 12.00

**Timeslot for presentation of the monitoring systems features,**  
including Q&A, discussion time and Break.

*Robert Schulz, New call administration/AF specification in BAMOS+  
Christian Bercker, Creation of call specific fields, MIA  
Christian Bercker, Implementation of financing to avoid rounding  
issues, MIA*

*Katarzyna Kromke-Korbel, SL2014*

- *Feature for programme specific fields in the application module*
  - *Implementation of financing (different cost categories have different financing rates (-> e. g. state aid relevance)*
- Discussions on the topics brought up by participants*

12.00 – 13.00

*Lunch break (with open breakout rooms for interaction)*

13:00 - 13:10

**Reconnection**

Interact

13.10 – 15.15

**Timeslot for presentation of the monitoring systems features,**  
including Q&A, discussion time and Break.

*Christian Bercker, the LOE excel upload, eMS  
Ioanna Kalaitzoglou, MIS DMS functionality*

**What worked well and what shall be improved,**

*Jean Christoph, UIA*

- *Features that users appreciate and we keep as such*
- *Features that users appreciate but need improvements*
- *Features that users would appreciate but still need to be developed*

*Discussions on the topics brought up by participants*

15.15 – 15.30

**Wrap up and discussion on potential topics for the future meetings**

*End of the meeting*
