

# **CAP-COM: Capitalisation towards a greater project impact**

14-15 May 2024 Agenda Prague | Czechia

### Outlines

Cap-Com 2024 is back, with a full menu of proposals towards a great project impact!

We are reuniting to present and discuss different ways how capitalisation can help you ensure that your project results have a long-lasting and visible impact. It is a complex and multi-level topic, so it is important to spend some time to discuss your persisting barriers and share practical solutions to overcome them. It is particularly important as programmes are now briskly stepping into the implementation of the current programming period.

During this two-day workshop, we will share practical capitalisation and communication tools and techniques, with a particular focus on project implementation and how to aim for greater project impact. The sessions will be balanced with open discussions on the benefits of implementing capitalisation in your context, as well as looking ahead beyond your own programme area, and beyond 2027.

### **Objectives**

As it has been the case in the previous CAP-COM events, the objective of this workshop is to foster knowledge exchange and collaboration among programme officers, both in charge of communication and programme management, raising doubts or issues on capitalisation topics and overcoming them by sharing experiences and potential solutions together.

Through these dynamic sessions, we aim to address common challenges, encourage you to make the most of capitalisation and communication tools that you have on hand, and feel inspired to put new practices into action.

The event is intended towards programme management and communication experts with little to no experience in capitalisation.
