NCPs: connect and exchange

21 June 2024

Online

Outline and objectives

The NCPs community was established in 2019 to address the needs identified by participants during events for programme contact points and based on Interact's needs assessment. This community provides a virtual workspace for national and regional contact/info points (NCPs) to share common challenges and solutions related to their daily work.

In 2024, the 5th NCP network meeting will be held on October 1-2 in Vienna, Austria. In preparation for this in-person event, Interact is organizing a 1.5-hour online session with NCP colleagues with the aim to:

- Discuss and identify the most pressing topics you would like to address during the in-person network meeting;
- Inform you about ongoing activities, events and tools that Interact is implementing, which may be beneficial for your daily work;
- Invite you to share your challenges and collaboratively seek support and eventually solutions;
- Provide an opportunity for you to update us on the NCPs' needs for 2025 and explore together how to address those needs.

This online session is designed to foster open exchange and collaboration among NCPs, ensuring that the upcoming activities and network meetings are tailored to your interests and needs.

NCPs: connect and exchange
