IT Tools and monitoring Systems Network

16-17 June 2025
Draft Agenda
Lisbon | Portugal

Outlines

The IT tools and monitoring systems network serves as a platform for experts in Interreg monitoring systems and related IT tools to engage in Europe-wide learning and information exchange. These monitoring systems are crucial for effective programme management and represent programmes to the outside world.

The network welcomes experts involved in monitoring system work and encourages programme service providers to participate.

The meeting follows a flexible and participant-driven approach, with the agenda shaped based on the topics proposed during registration. Attendees can expect informative presentations, demonstrations, and open discussions on monitoring systems and shared challenges.

Importantly, the event is not related to the Jems monitoring system.

Please note, while this event is organised by Interact, it is kindly hosted by the Interreg CBC Med programme. We are grateful to them for hosting and enabling this event.

Objectives

The main objectives of the meeting are to foster knowledge exchange and collaboration among experts in Interreg monitoring systems and related IT tools.

The meeting aims to provide a platform for participants to share experiences, insights, and best practices. It also seeks to showcase feature demonstrations of various monitoring systems, inspiring attendees with innovative and useful features. Through open discussions, participants can address common challenges, seek advice, and find potential solutions. Additionally, the meeting aims to gather input on potential topics for future gatherings, ensuring relevance and value for the IT Tools and Monitoring Systems Network. Ultimately, the meeting aims to enhance programme management and efficiency in monitoring systems through collective expertise and shared learning.

IT Tools and Monitoring Systems Network
16-17 June 2025
Lisbon | Portugal

Monday	16 June 2025

13:30 – 14:00   **Registration & Coffee**

14:00 – 14.30   **Introduction and warm-up**
Interact

14.30 – 15.30   **State of play**
Interact and Interreg programmes

- MS Mapping update
- A brief update of different MS

This session will provide an overview of the results from the updated MS Mapping survey, highlighting common and distinct features among programs developing their monitoring systems. Additionally, programmes will give brief updates on the status of their monitoring system development and plans for system audits.
