Let's Test Jems Together (8)
01 March 2024
Online

Outline

With the 10th release approaching, we invite you to join the forces in testing Jems!

With all the effort we put into the quality of the software, we would appreciate the help of the Core group members in testing the system thoroughly.

Objectives

The day aims to:

- Engage the Core group members in the real-life testing of Jems
- Give feedback on the system usability before the launch of the 10th release
- Encourage Core group members to test the system by themselves actively

What to expect from the Test day?

We will prepare Jems instances on the Interact server. There is no need to prepare a test environment on your side. The test day will include testing of the following:

- Payment claims to EC for projects falling (partly) under Article 94/95
- Annual accounts
- Project final report (as far as available on 1 March)

Testing will be organised in the breakout rooms and facilitated by the Jems team. More detailed information on the approach will follow on the test day as part of the welcome and introduction. Test cases will be provided by Interact.

Please invite your programme colleagues to join the testing! However, please be reminded that this is not a training session! Preparations ahead of the meeting regarding the business logic are advisable!
