Outlines

The Territorial Agenda (TA) 2030 is the European strategic frame for territorial development and spatial planning. It is meant to raise awareness for and support a number of major tasks & objectives- all of which require coordination and cooperation across borders. Just to name a few:

- the wise use of land,
- place-based development strengthening local democracy and counteracting the geography of discontent,
- least harmful infrastructure development for European connectivity,
- preventive climate change mitigation and water management,
- sustainable socio-economic integration beyond borders (as one of the priorities of the TA 2030!)

European Territorial Cooperation, aka Interreg, its programmes and projects can provide important contributions to the implementation of the Territorial Agenda 2030. This should be known and properly anchored in Interreg. We want to make territorial development a visible strategic element in the programme delivery system.

Now a stock-taking review of the TA 2030 has been started and should be concluded by the end of 2024. The overarching objective of the exercise is to give new momentum to the implementation process. We want to invite you to take part in this process and help us to mobilise the Interreg community for an active contribution.

Objectives

With the event we want to:

- Invite you to join the TA 2030 review process as stakeholder group and jointly prepare for it,
- Take a closer look at one of the pilot actions in the framework of the TA 2030,
- Look into good Interreg projects with a visible territorial element,
- Discuss options and challenges to make territoriality a more visible and distinct element of Interreg.

Please bring good territorial projects to this meeting! In case you are not sure which ones to choose, contact us:

Quest for territorial Interreg projects

You all have good examples in your programme: We want to raise awareness for the territorial element and quality in projects!

- 2-3 Testimonials from programme colleagues
- Discussion on options and challenges when it comes to territoriality as visible strategic element of project narratives

Objectives of the session: *Share and jointly develop options to raise the territorial profile of Interreg projects; we want to use your examples and pass it on to the drafting team to the TA 2030 review*
